

My Pain Management Plan

My needs for pain management may be different from other people's.

Please learn about any medications I may be taking and understand how they may affect the type of pain relief I need.

Higher doses of opioids may be required to appropriately manage my pain.

My medications:

My goals for pain management:

Opioids
are helpful.

I want to
avoid opioids.

I'd like to talk
about epidurals.

I'd like local
anesthetic.

Offer me
nitrous oxide gas.

Offer me
lidocaine patches.

Offer me
hot + cold packs

Offer ibuprofen
+ acetaminophen.

My providers recommend:

Please take time to talk to me about pharmacological and non-pharmacological ways to manage pain. Help me find the solutions that are right for me.

I want to know more about:
